SE-TB1

A stainless steel sheet
which saves money.

NEW!

Wir prägen Edelstahl.

SCHMIDT EDELSTAHL
GmbH

Application / Advantages

Cold store floors
in the gastronomy

Floors and facades
in the elevator construction

Slip-resistant
in the field of industry

Enhanced outing
optimisation in public areas

Specially suited for:

- flooring systems
- stairs
- swimming pools
- cover panels for machinery
- loading ramps and zones for trucks
- cold room floors
- facades
- booth construction
- elevator construction
- train stations / airports / shipbuilding

Advantages:

- slip-resistant surface
(German certificate)
- increased stability and rigidity
compared to smooth sheeting
- less roll-resistance
- cost-saving due to thinner material
- enhanced outing optimisation

considerably reduction in weight
(e.g. at 2500 x 1250 x 3 mm = approx. 13-15 kgs.)

Universal application

Technical data

Pattern:
SE-TB1

Standard formats in stock:

2500 x 1250 mm
3000 x 1250 mm
3000 x 1500 mm
Coil 1250 / 1500 mm

Fix lengths from coil can
be delivered in short-term

Thicknesses

> 0.8 mm ———
< 4.0 mm ———

Grade-No.:

1.4301 / 1.4404

Surfaces:

- certified slip-resistance
- R11 from coil / R12

Other basic grades and surfaces possible.

Herewith we would like to present our pattern SE-TB1, the latest product from our large product-program. It shows an excellent alternative to the known aluminium checker plates such as to the stainless steel-tear plate.

Due to its new and unique surface the SE-TB1 offers completely new possibilities.

As a slip-resistant floor plate with a low roll-resistance or as a wall cladding, the SE-TB1 can be used in different sectors.

The advantages of the SE-TB1 are obvious. Already thin floor plates are very resiliently.

Considering a sheet in middle format (2500 x 1250 x 3,0mm) the weight advantage is about 13,- kg compared to a conventional tear plate.

Thanks to our modern cut-to-length line we are able to supply fix-lengths or sheets from coil within short time.

As a family business having many years of experiences in the sector of pattern-rolled sheets we are pleased to support you in all of your steps of planning.

The alternative to aluminium

Extract from our production-program

- pattern-embossed sheets
- pattern-rolled sheets
- floor plates with certified slip-resistance
- marbled sheets (up to 2000m width)
- super-mirror sheets
- special finishes up to grain 1000
- profiles and parts of construction
- handrails & handgrips
- sheets for facades
